Depth First Search (DFS)

- BFS : First Discovered – First Explored

Depth First Search (DFS)

- BFS : First Discovered – First Explored
- DFS: Last Discovered – First Explored

Depth First Search (DFS)

- BFS : First Discovered – First Explored
- DFS: Last Discovered – First Explored

The algorithm keeps track of

Depth First Search (DFS)

- BFS : First Discovered – First Explored
- DFS: Last Discovered – First Explored

The algorithm keeps track of

$\text{color}[v]$ = white, grey, or black

Depth First Search (DFS)

- BFS : First Discovered – First Explored
- DFS: Last Discovered – First Explored

The algorithm keeps track of

$\text{color}[v]$ = white, grey, or black

$p[v]$ = u iff u discovered v

Depth First Search (DFS)

- BFS : First Discovered – First Explored
- DFS: Last Discovered – First Explored

The algorithm keeps track of

Same as
BFS

{ color[v] = white, grey, or black
p[v] = u iff u discovered v

Depth First Search (DFS)

- BFS : First Discovered – First Explored
- DFS: Last Discovered – First Explored

The algorithm keeps track of

Same as
BFS

{ color[v] = white, grey, or black
p[v] = u iff u discovered v

Different
from
BFS

Depth First Search (DFS)

- BFS : First Discovered – First Explored
- DFS: Last Discovered – First Explored

The algorithm keeps track of

Same as
BFS

$\text{color}[v]$ = white, grey, or black

$p[v]$ = u iff u discovered v

Different
from
BFS

$d[v]$ = “time” when v is discovered

Depth First Search (DFS)

- BFS : First Discovered – First Explored
- DFS: Last Discovered – First Explored

The algorithm keeps track of

Same as
BFS

$\text{color}[v]$ = white, grey, or black

$p[v]$ = u iff u discovered v

Different
from
BFS

$d[v]$ = “time” when v is discovered

$f[v]$ = “time” when v ’s exploration is completed

Depth First Search (DFS)

- BFS : First Discovered – First Explored
- DFS: Last Discovered – First Explored

The algorithm keeps track of

Same as
BFS

$\text{color}[v]$ = white, grey, or black

$p[v]$ = u iff u discovered v

Different
from
BFS

$d[v]$ = “time” when v is discovered

$f[v]$ = “time” when v ’s exploration is completed

To keep track of “time”, it uses a counter which is incremented by 1

- whenever a new node is discovered
- whenever it finishes exploring a node

a	b	c	d	e	f

DFS(G)

Edge Classification by DFS

A **non-tree** edge (u, v) of G is a

Cross edge $\Leftrightarrow u$ is **neither ancestor nor descendent** of v
in the DFS forest
 \Leftrightarrow not a forward or back edge

Adj List of G :

Colors of nodes:

B	B	B	B	B	B
a	b	c	d	e	f

Edge Classification by DFS

A DFS of a directed graph $G = (V, E)$ classifies the edges of G as follows:

Edge Classification by DFS

A DFS of a directed graph $G = (V, E)$ classifies the edges of G as follows:

$(u,v) \in E$ is a :

1. Tree edge

Edge Classification by DFS

A DFS of a directed graph $G = (V, E)$ classifies the edges of G as follows:

$(u,v) \in E$ is a :

1. **Tree edge** \Leftrightarrow u is the **parent** of v in the DFS forest

Edge Classification by DFS

A DFS of a directed graph $G = (V, E)$ classifies the edges of G as follows:

$(u,v) \in E$ is a :

1. **Tree edge** \Leftrightarrow u is the **parent** of v in the DFS forest

Non-tree
edges

Edge Classification by DFS

A DFS of a directed graph $G = (V, E)$ classifies the edges of G as follows:

$(u,v) \in E$ is a :

1. **Tree edge** \Leftrightarrow u is the **parent** of v in the DFS forest
2. **Forward edge** \Leftrightarrow u is an **ancestor** of v in the DFS forest

Non-tree
edges

Edge Classification by DFS

A DFS of a directed graph $G = (V, E)$ classifies the edges of G as follows:

$(u, v) \in E$ is a :

1. **Tree edge** \Leftrightarrow u is the **parent** of v in the DFS forest
2. **Forward edge** \Leftrightarrow u is an **ancestor** of v in the DFS forest
3. **Back edge** \Leftrightarrow u is a **descendant** of v in the DFS forest

Non-tree
edges

Edge Classification by DFS

A DFS of a directed graph $G = (V, E)$ classifies the edges of G as follows:

$(u,v) \in E$ is a :

1. **Tree edge** \Leftrightarrow u is the **parent** of v in the DFS forest
2. **Forward edge** \Leftrightarrow u is an **ancestor** of v in the DFS forest
3. **Back edge** \Leftrightarrow u is a **descendant** of v in the DFS forest
4. **Cross edge** \Leftrightarrow u is **neither ancestor nor descendant** of v in the forest

Non-tree
edges

Claim 1 :

u is an ancestor of v in a DFS of G

Claim 1 :

u is an ancestor of v in a DFS of $G \iff$

Claim 1 :

u is an ancestor of v in a DFS of $G \Leftrightarrow d[u]$

Claim 1 :

u is an ancestor of v in a DFS of $G \Leftrightarrow d[u] < d[v]$

Claim 1 :

u is an ancestor of v in a DFS of $G \Leftrightarrow d[u] < d[v] < f[v]$

Claim 1 :

u is an ancestor of v in a DFS of $G \Leftrightarrow d[u] < d[v] < f[v] < f[u]$
